10 months

€

Master of Global Supply Chain Management

The importance of supply chain management in major industries has increased rapidly in recent years. Logistics companies have continued to grow, despite the worldwide economic slowdown. For these reasons there is an important demand for graduates with specialized, practice-oriented knowledge in this field. Previous experience is not necessary to join this program covering a wide range of topics in preparation for a career in logistics and supply chain management anywhere in the world.

12 months

€

Master of China-Europe Business Studies

Aimed at students who wish to follow a career in management spanning Europe and Asia this program brings together candidates to study, compare and understand business from both the European and Asian perspectives. Participants have the opportunity of study in both Europe and Asia. Both groups complete their formal studies through a real-life consulting project. Whilst the emphasis is on European and Asian business cultures the in-depth exploration of intercontinental business, its opportunities and challenges, prepares young professionals for international management careers.

10 months

€

Master of Innovation and Entrepreneurship

Students aiming to start or further develop businesses on a local or global scale will find this program an intensive blend of a rigorous approach to idea generation, identification and selection. It then follows an exploration of risk and how contemporary management techniques aim to identify and reduce the potential impact of it on business success. The knowledge and skills covered are as relevant to small (start-up) through to large-scale innovation processes in global firms.
